

Secure Book Destruction

Each day at our 75,000 square foot facility, up to 20 tons per hour of books, directories, corporate reports, pamphlets and bound volumes of every type are shredded and baled for re-pulping into new paper. We thrive by offering a secure environment in which publishers or security minded managers can be assured their junk, obsolete, damaged, returned or excess material or office files will be processed and sent to a mill for re-pulping, after complete destruction.

Other Office Waste

Our unique operation and state of the art equipment, some of which is custom built on-site, enables us to handle not only book destruction, but also any other paper your facility generates, from paper rolls to corrugated cardboard.

Leave the separation to us

You can now combine your soft, hardcover and spiral-bound books, along with CD's and tapes in kits and mailers, transparencies, pamphlets, and office files, without pre-sorting. We also handle large rolls and butt rolls of paper, whether stacked on pallets or in gaylords.

Transportation

We manage our own fleet of trucks and drivers, and will also work with independent haulers. Pick-up is often possible on the same day (if a customer calls early) and usually within 24 hours. We can even spot trailers for our high volume customers.
